PROFILE

I have lived in Milan for most of my life. I am a Computer Engineering student at Politecnico di Milano and currently a freelance full stack CRM/ERP developer: my goal is to design lightweight, documented code while sharing useful resources in a concrete way. In my free time, I like to explore projects related to local inference so I can contribute to the open source community.

EXPERIENCE

Aly Service

April 2024 - Present / Developer / Milan

Development and implementation of customized Odoo solutions aimed at automating and optimizing business processes. Key role in guiding the company through a strategic technological transition, supporting digital transformation.

Al Confine

November 2022 - April 2024 / Waiter / Bartender / Milan

Front-of-house and bar experience in a people-facing environment, focused on customer service, operational rhythm, teamwork, and quality of the guest experience.

EDUCATION

Politecnico di Milano

September 2023 - December 2028 / Bachelor's degree, Computer Engineering

University path in Computer Engineering focused on technical foundations, algorithm design, engineering method, and problem solving.

Liceo Classico Cesare Beccaria

January 2016 - June 2023 / Student

Classical high school path completed before entering Politecnico di Milano.
